Experience

RESEARCH AND DEVELOPMENT | TRADESPARK AI | JUNE 2, 2025 – PRESENT

- Built and maintained an in-house AI compute cluster to support local LLM experimentation and deployment.
- Explored and implemented methods for securely connecting local LLMs to TradeSpark AI's internal knowledge sources.
- Developed MCP servers and RAG pipelines that let our models query and reason over company data in a fully local environment.
- Created automated scraping tools that handle authentication, scheduling, and network-state checks to keep data pipelines flowing reliably.

FABRICATION OPERATIONS SUPERVISOR | T BAILEY INC | FEB 16, 2014 – PRESENT

- Directed daily fabrication operations, ensuring alignment with project goals and maintaining efficient, high-quality production workflows.
- Coordinated and delegated tasks across the crew to maximize productivity, support smooth project execution, and uphold safety and quality standards.
- Applied rigorous quality control procedures and resolved complex CNC plasma hardware/software issues while interpreting detailed blueprints for precise fabrication.
- Utilized advanced welding techniques (GMAW, FCAW, Sub-Arc) and mentored junior team members to strengthen technical capability and overall team performance.

FOUNDER / CEO | CASCADIA JUICE CO. | MAR 1, 2014 – AUGUST 1, 2020

- Founded and scaled a manufacturing and distribution business, overseeing daily operations, product development, compliance, and customer relations to drive consistent growth and retention.
- Built operational systems—including inventory management, quality assurance, and internal networking infrastructure—to streamline production, reduce waste, and improve overall efficiency.
- Led brand development and digital marketing strategy across social platforms, increasing visibility and establishing a loyal customer base through targeted campaigns and community engagement.
- Managed financial planning, budgeting, and forecasting to ensure sustainable operations and informed decision-making throughout all stages of the business lifecycle.

PRODUCTION TEAM LEAD | LOUWS TRUSS | DEC 17, 2012 – FEB 14, 2014

- Directed Truss fabrication workflows, coordinating crew activities and ensuring all products met precise engineering and code specifications under tight deadlines.
- Interpreted and executed detailed blueprints, overseeing material cutting, adjustments, and assembly to maintain accuracy and production efficiency.
- Oversaw seamless production flow by managing inventory, packaging, and loading operations while upholding strict safety standards and fostering a collaborative team environment.

Education

B.S. IN COMPUTER SCIENCE | SKAGIT VALLEY COLLEGE, MOUNT VERNON, WA

Skills

- Programming: C++, Python, Java
- CNC Plasma Operation & Fabrication
- Training & Workflow Coordination
- Computer Hardware/Software Installation Troubleshooting & System Management
- Quality Control & Process Optimization
- Safety Compliance & Risk Mitigation
